Sprint 2 Report

Green Thumb

Santa Cruz Growers

November 4, 2016

Actions to stop doing:

This sprint was primarily about implementing the geo-location aspect our app and setting up a basic interface.

Actions to start doing:

Get our server set-up to host our database. Get a crude version of the app working.

Actions to keep doing:

Continue to communicate well as a group.

Work Completed:

User Story 1: (As a developer, I want to implement the geo-location aspect of the app.)

User Story 2: (As a user, I want to be able to enter my address or use GPS. This is because I like choices.)

User Story 3: (As a developer, I want to implement a slide out menu for the home screen.)
